

# HOW TO DETERMINE THE CORRECT SIZE OF THE SIZED LINE PADS:

>> RIGHT FOOT <<

1. Print the template on an A4 paper format print with 100% size.

## ATTENTION!

For the correct determination of the size the scale of the printout must be correct. Please check:

2. Fold the printout along the line. Place it against the wall and fix it to the floor if necessary.
3. Place heel **here** and measure while standing. **Please be sure to measure both feet.**
4. Using a pencil, draw dots between the toes (as close to the toe grab as possible).  
Now you can see the right size.  
If the drawn points are between two lines, then please order the number larger.

If the course of your toes does not correspond to one of the drawn lines, the toe bridge of our SIZED LINE unfortunately does not fit your feet.

You have determined 2 different sizes?  
Maybe your feet are different sizes.

In both cases we recommend the CUSTOM LINE binding.

If you are not sure or have any questions, please contact us by mail, phone or WhatsApp:
